SKILLS

- Windows Server (2012 R2, 2016, 2019, 2022, 2025)
- Active Directory, Azure AD Connect & Hybrid Identity
- GPO, DNS, DHCP, TCP/IP & IPAM
- PKI, AD CS & Certificate Management
- IT Infrastructure & Data Center Operations
- VMware, Hyper-V & Failover Clustering
- Firewall, Antivirus, Endpoint Security, EDR,
- OS Hardening, Security Baselines & CIS Benchmarks
- NIST, ISO/IEC 27001, HIPAA & Security Compliance
- Vulnerability Management (Qualys, Rapid7, ManageEngine)
- Patch Management & Compliance Reporting
- Backup, Disaster Recovery & Business Continuity
- PowerShell Scripting & Automation
- Microsoft Entra ID (Azure AD), Identity Governance & Entra ID Protection
- Privileged Identity Management (PIM), Conditional Access & Zero Trust Architecture
- Multi-Factor Authentication (MFA), Passwordless Authentication & Identity Security
- Microsoft Sentinel (SIEM/SOAR), Security Analytics & Automated Playbooks
- Microsoft Defender XDR (Endpoint, Identity, Office 365, Cloud Apps) & Threat Response
- Threat Hunting, Incident Investigation & Kusto Query Language (KQL)
- Technical Support, Root Cause Analysis & Troubleshooting
- IT Service Management (ITSM) & ServiceNow
- Service Request & Ticket Management
- IT Asset & Inventory Management
- Software Asset & License Management
- IT Procurement & Hardware Procurement
- Vendor Management & Vendor Coordination
- Contract, Warranty & AMC Management
- Team Leadership, Team Coordination & Technical Mentoring
- Cross-Functional Collaboration & Stakeholder Management
- Project Coordination & Production Deployment
- IT Documentation, SOP Development & Audit Documentation
- MIS Reporting & Dashboard Management,MS Excel

EDUCATION

Post-Graduation

MS/M.Sc Computers Science | Dr.Babasaheb Ambedkar Marathwada University | 2026 |71%

Graduation

B.Sc Biology |Dr. Babasaheb Ambedkar Marathwada University | 2016 | 61%

Schooling

Class XII | Maharashtra |English | 2005 |52.50%

Class X |Maharashtra |Marathi | 2003 |72.93%

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (SAA)
Microsoft Certified:Azure Administrator Associate(AZ104)
Microsoft Certified:Identity and Access Administrator Associate (SC-300)
Microsoft Certified: Security Operations Analyst Associate (SC-200)(Currently Pursuing)
Jetking Certified Internet of Things (IoT) Specialist

WORK EXPERIENCE

Softcell Technologies Global Pvt. Ltd

September 2025 - Present

Team Lead -Active Directory And Security Audit

- Administer enterprise Active Directory environments, including Users, Groups, Organizational Units (OUs), Domain Controllers, and FSMO Roles.
- Design, deploy, and manage Group Policy Objects (GPOs) to enforce security baselines and organizational policies.
- Manage Windows Server 2019, 2022, and 2025 environments, ensuring high availability, performance, and security.
- Implement OS Hardening using CIS Benchmarks and remediate security vulnerabilities to maintain compliance.
- Perform Vulnerability Assessments and remediation using Qualys, Rapid7, and Manage Engine.
- Administer Active Directory Certificate Services (AD CS), including PKI, Certificate Templates, CRLs, and Auto-Enrollment.
- Configure and maintain Microsoft Failover Clustering to support high-availability infrastructure.
- Manage WSUS, server patching, compliance reporting, and Windows update deployment across enterprise servers.
- Develop PowerShell scripts to automate administrative tasks, reporting, and routine operational activities.
- Support Azure AD Connect, Hybrid Identity, Active Directory health monitoring, troubleshooting, and Service Now/ITIL operational processes.

Inspira Enterprise India Pvt. Ltd.

January 2025 - September 2025

Active Directory Administrator

- Administered Windows Server 2012, 2016, 2019, and 2022 environments across Dell, HP, and Cisco UCS platforms, ensuring high availability and operational stability.
- Managed Active Directory infrastructure, including Users, Groups, Organizational Units (OUs), Domain Trusts, Group Policy Objects (GPOs), and multi-domain environments.
- Administered core infrastructure services including DNS, DHCP, TCP/IP, VPN, and IP Address Management (IPAM) to support enterprise network operations.
- Implemented OS Hardening using CIS Benchmarks (Level 1 & Level 2) and performed Vulnerability Assessments using Qualys, ensuring compliance with enterprise security standards.
- Managed WSUS patch deployment, security updates, compliance validation, and remediation of security vulnerabilities across Windows Server environments.
- Monitored Domain Controller health, Active Directory replication, and authentication services using DCDIAG, REPADMIN, and Event Viewer, resolving infrastructure issues proactively.
- Integrated On-Premises Active Directory with Azure AD using Azure AD Connect, supporting Hybrid Identity, Directory Synchronization, Single Sign-On (SSO), and Conditional Access.
- Collaborated with Security, Infrastructure, Audit, and Compliance teams to implement security controls, prepare audit documentation, and successfully remediate audit findings.
- Supported infrastructure modernization, migration projects, UAT, Change Management, and Production deployments while ensuring minimal service disruption.

H&B HR Solutions Pvt.Ltd

September 2023 - January 2025

Windows Server Administrator L3

- Administered multi-domain Active Directory infrastructure, including Sites & Services, Domain Trusts, Kerberos, LDAP authentication, and enterprise access management.
- Configured and maintained Group Policy Objects (GPOs), Security Baselines, and standardized Windows configurations for desktop and server environments.
- Managed Windows Server 2008 R2, 2012 R2, 2016, and 2019,2022, including server builds, upgrades, lifecycle management, and RAID configuration.
- Administered Microsoft Failover Clustering, VMware, and Hyper-V to deliver high availability and business continuity for critical applications.
- Administered Microsoft Failover Clustering, VMware, and Hyper-V to deliver high availability and business continuity for critical applications.
- Implemented PKI certificate deployment, endpoint security controls, antivirus management, and secure authentication practices across enterprise systems.
- Managed WSUS, Qualys,server patching, backup operations, preventive maintenance, and compliance with organizational security standards.
- Supported DNS, DHCP, SFTP, firewall administration, network troubleshooting, and core infrastructure services to maintain stable enterprise operations.
- Performed Active Directory health checks, replication monitoring, baseline validation, and infrastructure performance optimization.
- Collaborated with vendors and cross-functional teams to support IT operations, asset lifecycle management, documentation, SLA compliance, and production changes.

Windows Server Administrator L2

- Supported IT asset lifecycle management, hardware procurement, documentation, incident resolution, and vendor coordination to ensure efficient IT service deliveryAdministered Windows Server 2008 R2, 2012 R2, 2016, and 2019 environments, including server provisioning, RAID configuration, performance tuning, health monitoring, troubleshooting, and lifecycle management.
- Managed Active Directory, DNS, DHCP, Group Policy (GPO), PKI/AD CS, Microsoft Failover Clustering, and user access administration to ensure secure, highly available enterprise infrastructure.
- Installed, configured, and maintained HPE ProLiant DL360/DL380 Gen9 & Gen10, Dell PowerEdge R730/R740, and Cisco UCS C220/C240 M4/M5 servers, including BIOS, iLO, iDRAC, CIMC, firmware upgrades, RAID configuration, and hardware troubleshooting.
- Administered VMware vSphere, vCenter, and Microsoft Hyper-V, including virtual machine provisioning, Live Migration, snapshots, cloning, resource optimization, and P2V/V2V migrations.
- Designed, configured, and maintained Microsoft Failover Clusters, including cluster validation, SAN/iSCSI storage integration, Cluster Shared Volumes (CSV), quorum configuration, failover testing, Cluster-Aware Updating (CAU), and disaster recovery validation.
- Performed WSUS patch management, endpoint security, antivirus administration, backup & recovery, disaster recovery, vulnerability remediation, and OS hardening to maintain infrastructure security and compliance.
- Delivered enterprise Data Center Operations, including rack & stack, server installation, cabling, preventive maintenance, OEM vendor coordination (HPE, Dell & Cisco), IT asset management, incident resolution, and infrastructure support while ensuring maximum system availability.

Naice Jewels pvt.Ltd**June 2017 - June 2021****IT Executive L2 / System Administrator**

- Administered Windows Server 2008 R2, 2012 R2, 2016, and 2019, including server deployment, RAID configuration, performance monitoring, and infrastructure maintenance.
- Managed Active Directory, Group Policy (GPO), DNS, DHCP, PKI certificates, WSUS, and Hyper-V to support secure enterprise Windows environments.
- Configured Microsoft Failover Clustering, Synology NAS, backup solutions, and disaster recovery processes to improve business continuity.
- Administered Sophos and Cyberoam Firewalls, enterprise antivirus, endpoint security, and access control to strengthen infrastructure security.
- Managed VMware vSphere/vCenter, virtual machine provisioning, templates, cloning, snapshots, and storage optimization.
- Provided Wintel infrastructure support, IT asset management, procurement, documentation, and technical support for office and manufacturing environments.

Simtech Computronics Pvt.Ltd.**June 2008 - June 2017****Resident Engineer / It support Engineer**

- Delivered L1/L2 technical support for Windows desktops, laptops, printers, scanners, and enterprise applications while maintaining SLA commitments.
 - Supported Windows Server 2003/2008, Active Directory, DNS, DHCP, PKI certificate installation, and user account administration across enterprise environments.
 - Performed hardware installation, operating system deployment, software upgrades, data backup, preventive maintenance, and system health checks.
 - Assisted with LAN/WAN, switches, firewalls, wireless access points, enterprise antivirus, endpoint security, and network troubleshooting.
 - Managed IT asset inventory, vendor coordination (HP & Dell), documentation, UPS monitoring, and infrastructure support to ensure operational continuity.
-
